

Primary Care Nutrition Pathway for Adults Aged 65+

A Guide for Providing Nutrition Care to Older Adults in the Community

Footnotes:

- A medical home refers to a team-based healthcare delivery model led by the patient's most responsible primary healthcare provider (e.g., MD, NP, RN, social worker, pharmacist, RD, OT, PT, SLP, mental health worker, etc.). RDs may be internal to the medical home or an external resource (i.e., private practice).
- Community services may also include: telehealth, system navigation, mental health resources, Veterans Affairs, and addiction services.
- Solid arrows indicate prioritized actions.
- Refer to the guidance document for more information.

Funded by the Canadian Malnutrition Task Force, a standing committee of the Canadian Nutrition Society.
